DIPLODOCUS

DO YOU KNOW THAT...? CZY WIESZ, ŻE...?

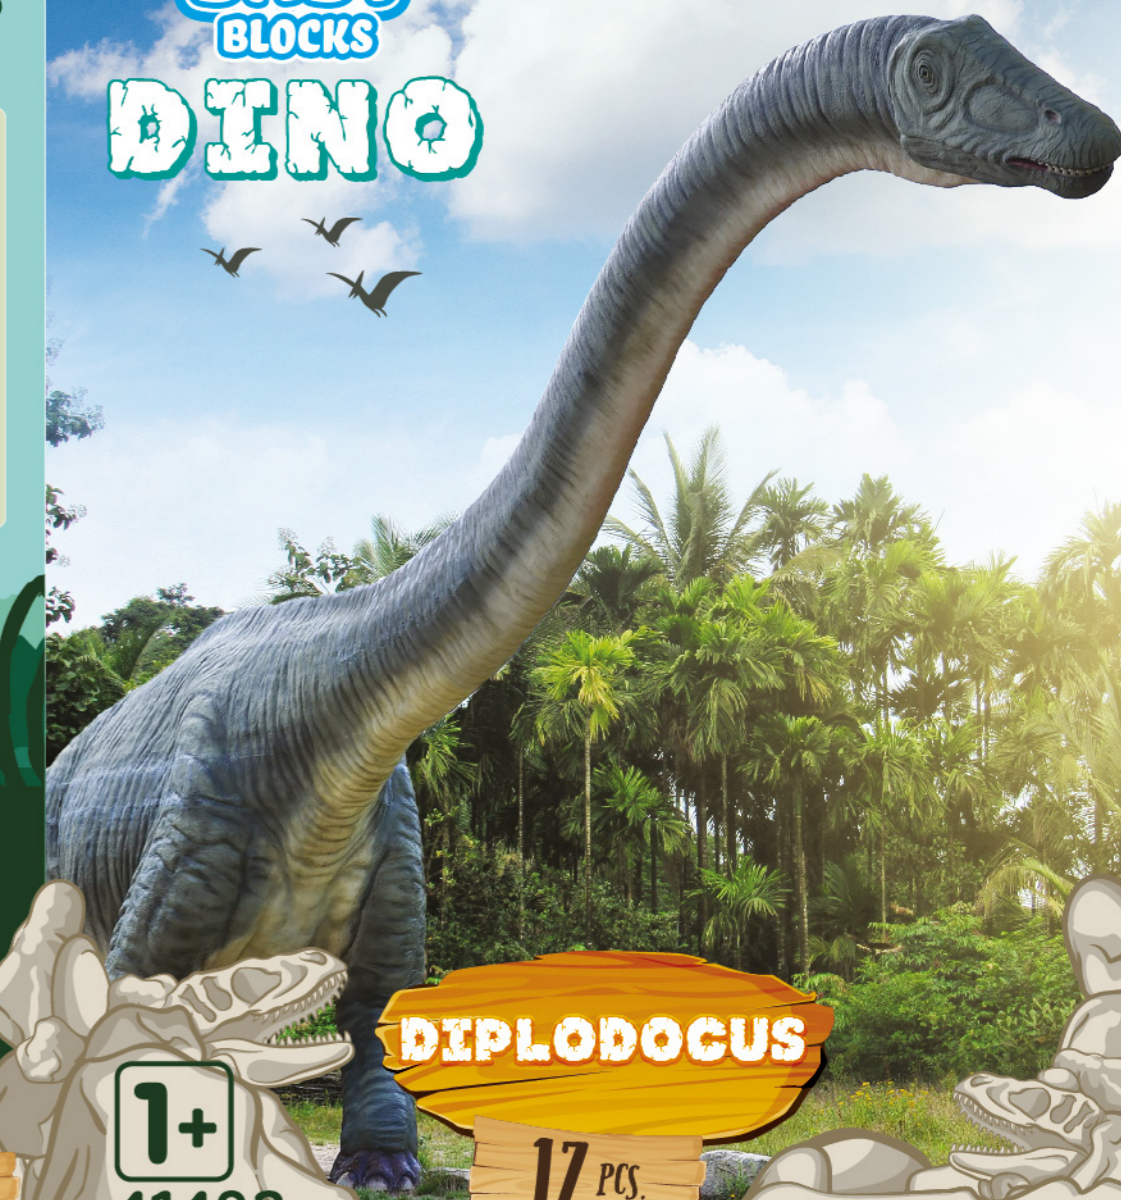

DIPLODOCUS is a herbivorous dinosaur with an extremely long neck and tail. It is one of the largest dinosaurs discovered by a man. Its length could reach up to 28 meters. Diplodocus had 7 meter long neck and could reach the tallest trees without moving at all! He weighed up to 20 tons and had a very small head. He used his strong tail as a defence against predators.

DIPLODOK to dinozaur roślinożerny o niezwykle długiej szyi i ogonie. Jest jednym z największych dinozaurów odkrytych przez człowieka. Jego długość mogła sięgać do 28 metrów. Diplodok miał 7-metrową szyję, dzięki której dosięgał do najwyższych drzew i nie musiał ruszać się z miejsca. Ważył nawet 20 ton i miał bardzo małą głowę. Przed drapieżnikami bronił się silnym długim ogonem.
