TRICERATOPS

DO YOU KNOW THAT...?

TRICERATOPS was large and round, with short but strong legs. It was 8 meters long and about 3 meters high – that's the same as a school bus and weighed about 8 tons – as much as 3 elephants. Triceratops had three horns, which were used to defend against enemies such as the Tyrannosaur – they were like sharp spears and could cause a lot of damage. Triceratops used a method similar to today's rhinoceros as defense against enemies. When he felt threatened, he attacked the enemy ramming him with horns and a huge body weight. Triceratops was herbivorous – it ate plants growing close to the ground.

CZY WIESZ, ŻE...?

TRICERATOPS był duży i okrągły, wyposażony w krótkie, ale mocne nogi. Miał 8 metrów długości i około 3 metry wysokości – to tyle co szkolny autobus i ważył od około 8 ton – tyle co 3 słonie. Triceratops posiadał trzy rogi, które wykorzystywał do obrony przed takimi wrogami jak Tyranozaur – działały jak ostre włócznie i mogły spowodować wiele szkód. Triceratops, jako obronę przed wrogami stosował metodę podobną do dzisiejszych nosorożców. Gdy poczuł się zagrożony atakował wroga taranując go rogami i ogromnym ciężarem ciała. Triceratops był roślinożerny – zjadał rośliny rosnące blisko ziemi.

HAVE FUN!
