GIRAFFE & LAMA

DO YOU KNOW THAT...? CZY WIESZ, ŻE...?

GIRAFFE is the tallest animal on the Earth, it lives in the savannas of eastern and southern Africa and is under a strict protection. Giraffe has big eyes surrounded by thick eyelashes and a few bone processes on the head. It is covered with spots that are unique. Each giraffe has a different pattern.

LAMAS belong to the camel family but do not have a hump. They are covered with thick white, black, brown or spotted fur. In stressful situations, it begins to spit and always tries to hit the eyes of his potential enemy. They live about 30 years.

ŻYRAFA to najwyższy współczesny ssak, żyje na sawannach wschodniej i południowej Afryki i znajduje się pod ścisłą ochroną. Ma duże oczy otoczone gęstymi rzęsami, a na głowie parę wyrostków kostnych. Pokryta jest cętkami, które są niepowtarzalne. Każda żyrafa ma inny wzór.

LAMY należą do rodziny wielbłądowatych ale nie posiadają garba. Pokryte są grubym futrem w kolorze białym, czarnym, brązowym lub łaciatym. W sytuacjach stresowych lama zaczyna pluć i zawsze próbuje trafić w oczy swojego potencjalnego wroga. Lamy żyją około 30 lat.
